

# NAPLAN — Delivering

## Platform guide 17: Print student session slips

The **principal** or **NAPLAN coordinator** must print the **student session slips**. This forms part of the TA pack that is provided to test administrators each day. Each participating student has a **different** student session slip specific to each test attempt which includes the test name, student name and unique student code.

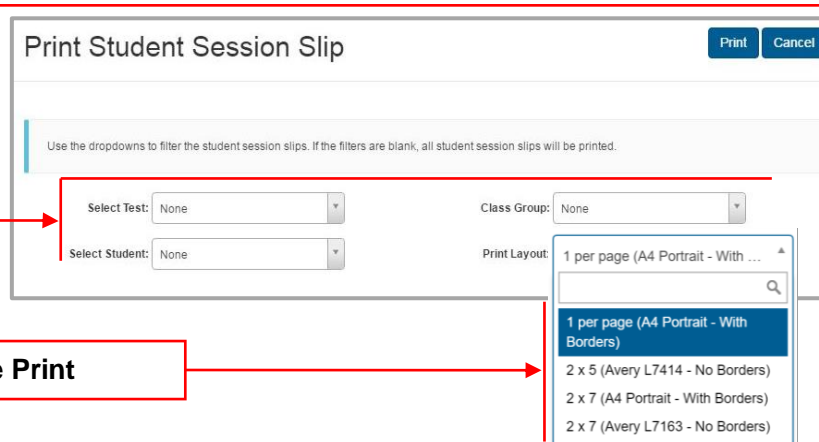

Each student code is linked to a specific test attempt, i.e. a separate code for writing, reading, conventions of language and numeracy.

All unused **student session slips** will be displayed — including test attempts that have not been **finalised**.

Apply filters (Test/Class Group) to select and display a specific group to print in batches.

**If no filters are used, the student session slips for all students for all test attempts will be printed.**

The display will reflect the filters and print layout applied.

4. Select **Print** to print all displayed students (scroll to view). Ensure the printing option is one sided only.

Test Name	Student Name	Student Code
